

01 April 2013

Dear Sir/Madam,

I have had the pleasure of working with Ms. Mui-Ling Teh on two occasions, most recently in my company 

Mui-Ling has spent most of her time with us preparing construction drawings for , including , and the new . She also occasionally assisted on other projects such as . Mui-Ling began working at  in 2010 and remained with us on a full-time basis until May 2012 at which time she left to follow her own pursuits. To Mui-Ling's credit, she came back on a few occasions when we needed help to finish projects she was previously involved in.

Mui-Ling's tasks involved integrating detailed information from clients and various consultants to help produce full sets of drawings. Her consistency, precision, and attention to detail were most notable.

When required, Mui-Ling also helped prepare 3D visual graphics and built physical models, often on very tight deadlines. These tasks were always completed on time, and to the satisfaction of our clients.

Mui-Ling is a hard-working, organized, detail-oriented, and cooperative individual. She works well independently, but will not hesitate to ask questions and work with others when the situation calls for it. She always displays a strong commitment to her work, and is highly dependable.

Mui-Ling would be a valuable member to any team, and I would not hesitate to recommend her to any prospective employer.

Yours Sincerely,
